Work Package #2
Sustainable Building

Milestone WP #2 R1: Updated bibliographic research and literature

BIBLIOGRAPHY OF THE MOST CURRENT AND RELEVANT PUBLICATIONS

Contents

SUSTAINABLE BUILDING AND ROADMAPPING

Architecture and Urbanism Program, Graduate School of Science and Technology, Meiji University (2018): ASEAN dual-city joint workshop: Vietnam Ho Chi Minh. Available online at https://www.researchgate.net/publication/351023714_ASEAN_2CT_WS_01_HCM_2017, updated on 5/26/2021, checked on 5/26/2021.

Architecture and Urbanism Program, Graduate School of Science and Technology, Meiji University (2020): ASEAN dual-city joint workshop 3 | Phnom Penh, Cambodia, checked on 5/26/2021.

Asian Development Bank. (2018). Cambodia Energy Sector Assessment, Strategy, and Road Map. Available online: https://www.adb.org/documents/cambodia-energy-assessment-strategy-road-map (accessed on 4 March 2021).

Behrendt, S.; E. Göll; F. Korte (2018). Effizienz, Konsistenz, Suffizienz Strategieanalytische Betrachtung für eine Green Economy; IZT - Institut für Zukunftsstudien und Technologiebewertung gemeinnützige GmbH. ISBN: 978-3-941374-35-5

Braune A, Geiselmann D, Lemaitre C, Oehler S. (2018) Framework for carbon-neutral buildings and sites. German Sustainable Building Council (DGNB)

David Fullbrook, John McGinley, Richard de Ferranti, Stephen Higgins (2016) Switching On: Cambodia's Path to Sustainable Energy Security

Durdyev, S.; Omarov, M.; Ismail, S. (2016) SWOT Analysis of the Cambodian Construction Industry Within the ASEAN Economic Community; Vision 2020: Innovation Management, Development Sustainability, and Competitive Economic Growth

Economic Research Institute for ASEAN and East Asia - ERIA (2021): Energy Efficiency and Conservation Master Plan of Cambodia. Available online: https://www.eria.org/publications/energy-efficiency-and-conservation-master-plan-of-cambodia/ (accessed on 4 March 2021).

Essam, Y.M.; Shannon, W.; Gary, K. Making Growth Green and Inclusive: The Case of Cambodia; OECD Green Growth Papers; OECD Publishing: Paris, France, 2013; Volume 9. 3. Cambodian National Assembly.

GGGI (2021) . CAMBODIA COUNTRY PLANNING FRAMEWORK (CPF). Version 2. Available online: https://gggi.org/report/cambodia-country-planning-framework-2021-2025/ (accessed on 4 March 2021)

GGGI (2016)| Cambodia Green Urban Development Program – Phase 1 | ICEM Green City Strategic Planning Methodology | March 2016

GlobalABC/IEA/UNEP (Global Alliance for Buildings and Construction, International Energy Agency, and the United Nations Environment Programme) (2020): GlobalABC Regional Roadmap for Buildings and Construction in Asia: Towards A Zero-Emission, Efficient and Resilient Buildings and Construction Sector, IEA, Paris

Hong-Trang Nguyena; Matthew Graya (2016). A Review on Green Building in Vietnam. Sustainable Development of Civil, Urban and Transportation Engineering Conference. Procedia Engineering 142 (2016) p.314-321. DOI: 10.1016/j.proeng.2016.02.053

IEA (2021): The Future of Cooling in Southeast Asia. Available online at https://webstore.iea.org/the-future-of-cooling-in-southeast-asia (accessed on 4 March 2021)

Kahlenborn, W.; J. Clausen; S. Behrendt, E. Göll (Hg) (2019). Auf dem Weg zu einer Green Economy - Wie die sozialökologische Transformation gelingen kann. adelphi. ISBN 978-3-8394-4493-1

Kosow Hannah; Gaßner Robert (2008): Methoden der Zukunfts- und Szenarioanalyse. Überblick, Bewertung und Auswahlkriterien. In: Institut für Zukunftsstudien und Technologiebewertung ITZ: Werkstattbericht; 103. ISBN: 978-3-941374-03-4

NCSD; GGGI; ICEM. The Green City Strategic Planning Methodology. 2016. Available online: http://gggi.org/wp-content/uploads/2016/08/Annex-A-AAS1507-REP-006-Final-Green-city-strategicplanning-methodology.pdf (accessed on 24 October 2019).

Ott, Döring (2011) „Theorie und Praxis starker Nachhaltigkeit - Beiträge zur Theorie und Praxis starker Nachhaltigkeit“, 3. Auflage 2011, 404 Seiten, ISBN 978-3-89518-695-0, metropolis Verlag, Marburg

Puthearath Chan; Myeong-Hun Lee (2019). Developing Sustainable City Indicators for Cambodia through Delphi Processes of Panel Surveys. In Sustainability 2019, 11, 3166, DOI:10.3390/su11113166

Puthearath Chan; Myeong-Hun Lee (2019). Prioritizing Sustainable City Indicators for Cambodia. In Urban Sci. 2019, 3, 104; doi:10.3390/urbansci3040104

Schwede, Dirk; Waibel, Michael; Hesse, Christoph; Ngo, To Thi Nhien (2016): Promoting Climate Adapted Housing and Energy Efficient Buildings in Vietnam: Chances and Challenges. In Antje Katzschner, Michael Waibel, Dirk Schwede, Lutz Katzschner, Michael Schmidt, Harry Storch (Eds.): Sustainable Ho Chi Minh City: Climate Policies for Emerging Mega Cities. 1st ed. 2016. Cham: Springer International Publishing, pp. 239–258.

Schwede (2019) „Guidelines on Green Building in Winter Cold and Summer Hot Climate in China“, EC-link project, GIZ China (to be published)

Schwede D. (April 23rd 2020). Road-Mapping for a Zero-Carbon Building Stock in Developed and Developing Countries, Zero-Energy Buildings - New Approaches and Technologies, Jesús Alberto Pulido Arcas, Carlos Rubio-Bellido, Alexis Pérez-Fargallo and Ivan Oropeza-Perez, IntechOpen, DOI: 10.5772/intechopen.92106. Available online: https://www.intechopen.com/books/zero-energy-buildings-new-approaches-and-technologies/road-mapping-for-a-zero-carbon-building-stock-in-developed-and-developing-countries

Serdar Durdyev; Edmundas Kazimieras Zavadskas; Derek Thurnell; Audrius Banaitis; Ali Ihtiyar (2018): Sustainable Construction Industry in Cambodia: Awareness, Drivers and Barriers. In Sustainability 2018, 10, 392. DOI:10.3390/su10020392

Sustainability of construction works - Environmental product declarations - Core rules for the product category of construction products. Beuth Verlag, Berlin. German version EN 15804:2012+A1: 2013, DOI: 10.31030/2074465

SUSTAINABLE BUILDING DESIGN FOR TROPICAL CLIMATES Principles and Applications for Eastern Africa (2014) by UN-Habitat. ISBN: 978-92-1-132644-4

Thovichit Pimsiri (2007). Green buildings: defining sustainable construction materials in Thailand. Retrospective Theses and Dissertations. Available online: https://lib.dr.iastate.edu/rtd/14530 (accessed on 24 October 2019).

UNDP (2020) Energy Efficiency in Buildings: Accelerating Low-carbon Development in Cambodia. Policy Brief & In-country Case Studies. Available online: https://www.kh.undp.org/content/cambodia/en/home/library/energy-efficiency-in-buildings---accelerating-low-carbon-develop.html (accessed on 4 March 2021)

World Green Building Council (2020): The benefits of green buildings | World Green Building Council. Available online at https://www.worldgbc.org/benefits-green-buildings, updated on 9/24/2021, checked on 9/24/2021.

IEQ AND THERMAL COMFORT

A.K. Persily Evaluating building IAQ and ventilation with indoor carbon dioxide ASHRAE Transactions, 103 (2) (1997), pp. 193-203

Al horr, Yousef; Arif, Mohammed; Katafygiotou, Martha; Mazroei, Ahmed; Kaushik, Amit; Elsarrag, Esam (2016): Impact of indoor environmental quality on occupant well-being and comfort: A review of the literature. In International Journal of Sustainable Built Environment 5 (1), pp. 1–11. DOI: 10.1016/j.ijsbe.2016.03.006.

G.S. Brager, R.J. De dear (1998), Thermal adaptation in the built environment: a literature review Energy and Buildings, 27 (1) pp. 83-96

J. Han, W. Yang, J. Zhou, G. Zhang, Q. Zhang, D.J. Moschandreas (2009), A comparative analysis of urban and rural residential thermal comfort under natural ventilation environment Energy and Buildings, 41 (2) pp. 139-145

Laskari, M., Karatasou, S., Santamouris, M. (2017).A methodology for the determination of indoor environmental quality in residential buildings through the monitoring of fundamental environmental parameters: A proposed Dwelling Environmental Quality Index. Indoor and Built Environment, vol. 26, no. 6, pp. 813-827.

Nguyen, Anh Tuan; Singh, Manoj Kumar; Reiter, Sigrid (2012): An adaptive thermal comfort model for hot humid South-East Asia. In Building and Environment 56, pp. 291–300. DOI: 10.1016/j.buildenv.2012.03.021.

P.O. Fanger (1970) Thermal Comfort: Analysis and Applications in Environmental Engineering McGraw-Hill, New York

P.O. Fanger (1988), Olf and decipol: new units for perceived air quality Building Services Engineering Research and Technology, 9 pp. 155-157

P.O. Fanger, J. Toftum (2002), Extension of the PMV model to non-air-conditioned buildings in warm climates Energy and Buildings, 34 (6) pp. 533-536

Paraskevi Vivian Dorizas; Maarten De Groote; Jonathan Volt (2018): The Inner Value of a Building: Linking Indoor Environmental Quality And Energy Performance In Building Regulation. Available online at http://bpie.eu/wp-content/uploads/2018/10/The-Inner-value-of-a-building-Linking-IEQ-and-energy-performance-in-building-regulation_BPIE.pdf (accessed on 6 March 2021)..

W. O. Collinge; A. E. Landis; A. K. Jones; L. A. Schaefer; M. M. Bilec (2012): Integrating Indoor environmental quality metrics in a dynamic life cycle assessment framework for buildings. In : 2012 IEEE International Symposium on Sustainable Systems and Technology (ISSST). 2012 IEEE International Symposium on Sustainable Systems and Technology (ISSST), pp. 1–6.

STANDARDS

ANSI/ASHRAE 55 (2004), Thermal Environmental Conditions for Human Occupancy, American Society of Heating, Refrigerating and Air-Conditioning Engineers, Atlanta, USA, 2004.

ASHRAE. (2007). Ventilation for Acceptable Indoor Air Quality. American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc., Atlanta, GA.

ASHRAE. (2010). Guideline 10P, Interactions Affecting the Achievement of Acceptable Indoor Environments. Altanta, USA.

bre, BREEAM International, BRE Global Ltd, 2019.

DGNB system, DGNB GbmH, 2018

EN ISO 7730. (2005). Ergonomics of the thermal environment: Analytical determination and interpretation of thermal comfort using calculation of the PMV and PPD indices and local thermal comfort criteria. European Committee for Standardization, Brussels.

ISO 2017, DS/ISO 17772-1 (2017) Energy performance of buildings – Indoor environmental quality – Part 1: Indoor environmental input parameters for the design and assessment of energy performance of buildings

ISO, 2017 (8) 2019 CEN, EN 16798-1 (2019) Energy performance of buildings – Ventilation for buildings – Part 1: Indoor environmental input parameters for design and assessment of energy performance of buildings addressing indoor air quality, thermal environment, lighting and acoustics

LEED v4.1, U.S. Green Building Council, 2019, v4.1

WELL. (2017). The WELL Building Standard. International WELL Building Institute, NY
